Advanced No-surgery Health care

## *Faced with surgery or life of a cripple, RFQMR brings hope to millions of Arthritis patients*

### Technological Advancement (RFQMR) cures wincing pains of arthritis

Ludhiana (India): Cytotron is the treatment millions of patients world over have been waiting for to relieve them of pain of arthritis. This new revolutionary device available at Sibia Medical Centre is developed after nine years of research to cure osteoarthritis by regenerating new cartilage without surgery or injections. Osteoarthritis is a degenerative disease, more in females and gradually worsens with age causing pain, stiffness, grating sensation, loss of mobility and forcing many to use walking stick, walker or wheel-chair and some even get bedridden. Osteoarthritis is also commoner in sport persons.

Cytotron produces Rotational Field Quantum Nuclear Magnetic Resonance (RFQMR) by 288 guns controlled by high-tech computers to stimulate cartilage regeneration. Most patients treated had lost all hope and were advised knee replacement. After treatment most have pain relief and few require pain killers and can walk, climb stairs and lead an improved quality of life.

Results vary according to the disease process and many could do away with their walking sticks or wheel chairs and no longer require knee replacement. These patients are also saved from the harmful effects of the pain killer medicines on the liver and kidneys. Cytotron can treat osteoarthritis of the hip, knee, ankle, shoulder, elbow, wrist joints and also of the back.

Cytotron is treatment of the future and is available in Sibia Medical centre, Ludhiana (Punjab) in North India.

Cytotron has been written about in: Indian Journal of Aerospace Medicine, Sainik Samachar (Journal of India's Armed Forces), Current Science, The Week, Red Hering, Business World, Newsweek, Times of India, Hindustan Times, Deccan Herald, Tribune, Business Line, The Hindu, Times News Network, etc

#### Revolutionary

Hundreds saved from costly and risky knee surgery.

**Breakthrough:** Cartilage re-growth made possible for the first time enabling more comfortable walk without pain killers.

**Method:** Rays focused ½ to 1 hour daily for 21 days.

**Safe & Comfortable:** No pain or side effects.

**Whom is Cytotron for?** Advanced osteoarthritis.

Early osteoarthritis – to reverse arthritis and avoid crippling end stage.

Helpful in Rheumatoid arthritis also.

**Proven results:**

MRI and X-ray documented.

**Note:** It is advised not to use the information provided for diagnosis or treatment purpose as it can be dangerous and to consult the physician for the same.

**CYTOTRON - REGENERATIVE TISSUE ENGINEERING:** ISO Certified : For Arthritis pain to regenerate & repair joint cartilage

**CYTOTRON - DEGENERATIVE TISSUE ENGINEERING:** To fight Cancer by arresting tumor cell growth.

**PREVENT & REVERSE HEART DISEASE - For failed bypass, unfit for bypass or not wanting bypass:** Artery Clearance Therapy (ACT) / Chelation Therapy (ACAM) USA Protocol – to increase blood flow, detoxification & anti-ageing therapy.

External Counter Pulsation (ECP) FDA (USA) approved to create bypass naturally

**AVOID HEART ATTACK with CARDIOVASCULAR CARTOGRAPHY (CCG):** FDA (USA) approved for Heart Flow mapping

**REMOVE KIDNEY STONES WITH RAYS:** FDA (USA) approved Lithotripsy (ESWL)
